SUMMARY

Computer Engineering student with practical experience in Machine Learning, Computer Vision, and data analysis using Python, SQL, and TensorFlow. Built real-world projects that involved model development, data preprocessing, and complete AI solutions.

I have a solid grasp of turning raw data into useful insights and deploying models for real-world applications. I am familiar with data pipelines, feature engineering, and model evaluation. I have basic exposure to GenAI concepts, including prompt engineering and RAG-based workflows, and I am very interested in creating scalable AI solutions.

SKILLS

Python • SQL • Machine Learning • Deep Learning • Pandas • NumPy • Power BI • ETL • Computer Vision

PROJECTS

GestureTalk-AI 2026

Sign Language Recognition System

- Developed a sign language recognition system with computer vision and CNN-based deep learning architectures.
- Constructed models through TensorFlow for precise classification of gestures.
- Integrated the complete workflow from data pre-processing to model training and validation.
- Performed real-time prediction using webcam, images, and videos.
- Obtained 90%+ accuracy through optimal model configurations.

Tools Used: Python, OpenCV, MediaPipe, TensorFlow, Flask.

Customer Churn Analysis & Predictive Modeling 2026

- Analyzed telecom customer data to identify churn patterns and key business drivers.
- Performed data cleaning, transformation, and feature engineering using Python and SQL.
- Built machine learning models (Logistic Regression, Random Forest) for churn prediction.
- Evaluated model performance and achieved ~80% accuracy.
- Generated insights to support customer retention and business decision making.

Tools Used: Python, SQL, Scikit-learn, Power BI.

Customer Behavior Analytics Dashboard 2025

- Processed and analyzed 3,000+ customer records to identify trends and segmentation
- Performed SQL-based data analysis and preprocessing for structured insights
- Developed Power BI dashboards to track KPIs and business performance
- Delivered actionable insights to support data-driven decision making

Tools Used: Python, SQL, Power BI

EDUCATION

B.Tech – Computer Engineering 2022 – 2026

DY Patil University Pune, Ambi. 

CERTIFICATES

Data Analytics & Data Science Professional Program

- Fortune Cloud Technologies

Data Science with Python

- IBM Cognitive Class

GenAI Powered Data Analytics Job Simulation

- TATA (Forage)

LANGUAGES

English

Hindi
